

SAVARIO JENKINS

COMPUTER SCIENCE STUDENT | SOFTWARE ENGINEERING

jenkins.savario@outlook.com | 904.755.1224 | savariojenkins.com

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building C#, Python, C++ GUI applications and implementing core data structures and algorithms. Brings professional experience in logistics operations and team leadership, with strengths in technical problem-solving, accuracy, communication, and independent ownership. Seeking software engineering internships and entry-level opportunities.

EDUCATION

Santa Fe College | Associate in arts, Computer Science Track Expected Summer 2027

Guaranteed transfer pathway: University of Florida | Intended B.S. in Computer Science | Fall 2027

Current focus: C++, object-oriented programming, data structures and algorithms, software development

TECHNICAL SKILLS

Languages: C++, C#, Python, Java, JavaScript

Tools: Git, GitHub, Visual Studio, wxWidgets, Terraform, AWS

Concepts: Object-oriented programming, data structures and algorithms, GUI development, LLM applications, Infrastructure as Code, data analytics

SELECTED PROJECTS

LLM-Powered Document Analysis | Python

In Development

- Developing a Python-based document intelligence application that uses large language models to extract key information, generate concise summaries, and answer natural-language questions from document content.

AWS Web Server Infrastructure as Code | Terraform, AWS

In Development

- Building reproducible AWS infrastructure with Terraform to provision and configure a web server, applying Infrastructure as Code principles to automate cloud deployment, networking, and security configuration.

Trading Performance Analytics

In Development

- Developing an analytics workflow that transforms raw trading results into actionable insights by measuring profitability, win rate, drawdown, risk-to-reward performance, and trading trends through summaries and visualizations.

C++ Software Projects | C++, wxWidgets, OOP

Completed Coursework

- Created GUI applications including Brick Breaker, a Game of Life simulator, and a calculator, applying event handling, state updates, and object-oriented design.
- Implemented a dynamic array, doubly linked list, dictionary, binary search tree, and Huffman coding to strengthen memory management and algorithmic problem-solving.

EXPERIENCE

Operations & Logistics Specialist | SRM Concrete

Sept 2021 - Present

- Coordinate time-sensitive assignments across dispatch, customers, and job sites while adapting to route and schedule changes and resolving issues independently.
- Maintain accurate digital records, delivery tickets, product details, and compliance documentation in a fast-paced operational environment.
- Inspect equipment and identify safety or maintenance concerns before they disrupt operations while following company procedures and federal transportation regulations.

Supervisor | Freddy's Frozen Custard & Steakburgers

June 2016 - Sept 2020

- Led a team of 8 employees during peak hours, trained new staff, and contributed to a 15% improvement in customer satisfaction ratings.
- Managed inventory and stock levels, reducing waste by 10% through careful monitoring and an optimized ordering process.
